PROFILE

Front-End developer with experience in creating SPA using React, Apollo GraphQL/Redux, TypeScript as the main stack, and I want to develop in this direction. Now I am improving my skills in this direction and expanding them with new technologies. I'm studying Node.js, because my next focus is to become a Full-Stack Developer. I spend my free time studying English and technical documentation. Ready to consider project work and full-time employment.

WORK EXPERIENCE

FULL STACK DEVELOPER

cmdF5 | May 2021 - Present 2021 - 9 months

- Implemented new features on the Back-End, such as:
 - Used TypeORM to create relationships between tables and entity classes to access and update information in the database.
 - Created GraphQL queries and mutations to interact with PostgreSQL database.
 - Implementing mailing using Express and Nodemailer
 - Login implementation using JWT token
- As for the Front-End:
 - CRUD operations using Apollo GraphQL, updating cache after mutation.
 - Using UI library Mui (Material UI) and integration with Formik library.

FRONT-END DEVELOPER

FREELANCE / TEAM WORK | Apr 2021 - Jun 2021 - 2 months

- Project architectural solutions (layering UI, BLL, DAL)
- Implementation of new features such as:
 - RESTful (Registration / loginization / pagination etc.)
 - Proper BLL state management with Redux, Thunk etc.
 - During the development process, I wrote tests for the reducer (TDD) using Jest.
 - Translated the application to the Redux Toolkit to set a clear and understandable flow and simplify debugging in the future.
 - TDD with Jest, Storybook, Postman
 - Performance enhancement (memo, useMemo, useCallback, lazy loading, Suspense etc.)
 - Migration to Typescript

My Hobby

2012 - 2018

- Development of websites based on CMS WordPress, DLE, Joomla and many others.
- Development of a game server on a linux VPS/VDS system
- Developing simple plugins in Pawn
