WORK EXPERIENCE

FRONT-END DEVELOPER
REELANCE / TEAM WORK | Jan 2021 - PRESENT

- Project architectural solutions (layering UI, BLL, DAL)
- Create functional and technical application documents
- Added new functionality in accordance with the new endpoints (REST) on the back-end, namely login, registration, password recovery, password reset.
  - I used React Form, Formik, Formact, useForm.
  - During the development process, I wrote tests for the reducer (TDD) using Jest.
  - Translated the application to the Redux Toolkit to set a clear and understandable flow and simplify debugging in the future.
  - Fixed bugs related to side effects (using React .memo, useCallback, useEffect cleanup)
